DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a portable electronic apparatus, classified in class 361, subclass 814.
- II. Claims 20-28, drawn to a method of manufacturing a portable electronic apparatus, classified in class 29, subclass 841.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of manufacturing a portable electronic apparatus can be used an adhesive, solder, or any chemicals instead of using injecting a polymer material.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Francis J. Maguire (Reg. No. 31,391) on December 18, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
